5.   Once you have answered all the questions, click on the **Submit** button.

Question **5**   Not yet answered   Marked out of 1.00

Sitting down for long hours is a hidden cause of early death among women. A study by Cornell University in the United States looked at the health history of 93,000 women in their later middle age. This came up with some surprising findings, the most important of which was that sitting down for most of the day was far more detrimental to women's health than anyone preciously realised.

(Source: JEM, Vol 12, Issue 5)

Select one:
- A. Middle aged women die earlier because they sit down too much.
- ● B. A study reveals that women who sit down for long hours tend to die earlier.
- C. A study confirms that women shouldn't sit down for long periods.
- D. A study shows that sitting down can be fatal.
